Backlog

What functional and non-functional requirements as well as changes should be realized in the current sprint?

Go back to the "Lean Offerings" canvas and verify if the functional requirements are part of the minimal set of user stories you defined for your lean offering.

Importance ↑

Ready

What functional and non-functional requirements as well as changes are ready?

Use color coding to define responsibilities.

Work in Progress

What functional and non-functional requirements as well as changes are in development?

Testing

What functional and non-functional requirements as well as changes are being tested?

Done

What functional and non-functional requirements as well as changes are done and ready for launch?
